

## Invitation

### Focus in Celiac Disease

### Interreg Central Europe CE111

**Second targeted event, 3<sup>rd</sup> Feb 2017, Munich – Germany**

Alois-Alzheimer-Saal, Nußbaumstraße 7, 80337 München

#### ***e-tools in CD Management – Support for Health Care Professionals & Patients***

Celiac disease (CD) is a common food intolerance against the wheat-protein Gluten, which leads to a systemic inflammatory process, particularly affecting the small intestine. CD may present with various symptoms such as diarrhoea, unintended weight loss, nutrient deficiencies or fatigue. In children and adolescents it may also present with growth retardation.

With a prevalence of 1%, about 5 million people of all ages are affected in Central Europe. However, the diagnostic delay of this life-long disease is still estimated to be 6 to 10 years. Furthermore, screening studies show that a high proportion of celiac patients remain undiagnosed, which may lead to a number of potentially preventable complications such as osteoporosis, neurological disorders, malignancies and impairments of the quality of life.

In Central Europe, different knowledge capacities and health care systems exist, which are insufficient and only partially address current problems. The project “Focus in CD”, project, which is supported by the European Regional Development Fund of the European Union (Interreg Central Europe, CE111), aims to improve the situation of CD management in this region by transnational cooperation.

One of the main tasks of “Focus in CD” is the development of e-tools, which include e-learning programmes for health care professionals and patients as well as an App to support physicians in the diagnostic process of CD.

To drive our project forward, we kindly invite you to participate in our international targeted event on e-tools in CD management. The event will begin with a seminar comprising four stimulating presentations on different e-tools, but also addressing the needs of celiac patients. In the second part, we encourage you to participate in our workshops in which our team of “Focus in CD” project partners will discuss the contents and most relevant topics of our e-learning programmes.

**Please find more details in the programme and send us your feedback by sending us the enclosed registration form via email to [zoeliakie@med.uni-muenchen](mailto:zoeliakie@med.uni-muenchen) or via fax to 089-44005-7898.**

Prof. Dr. Dr. hc. Berthold Koletzko  
Stiftung Kindergesundheit

**We are looking forward to your participation!**

Prof. Dr. med. Sibylle Koletzko  
Dr. von Haunersches Kinderspital, Abteilung Gastroenterologie

2<sup>nd</sup> targeted event, 3<sup>rd</sup> Feb 2017, Munich – Germany

Alois-Alzheimer-Saal, Nussbaumstr. 7, 80337 München

***e-tools in Celiac Disease Management -***

***Support for Health Care Professionals & Patients***

### Part 1 – Seminar: Opportunities and needs of e-tools in CD management

08:30-08:45	Welcome and Introduction	Prof. S. Koletzko Prof. Berthold Koletzko Jasmina Dolinsek
08:45-09:15	e-Learning: advantages and opportunities in pediatric medical education	Dr. Tudor Pop
09:15-09:45	What do Celiac patients really need? Experiences of the German support group	Dr. Stephanie Baas
09:45-10:15	Guide the doctor - an App to reach the correct diagnosis	Dr. Jörg Felber
10:15-10:45	The CoelKids experience - self-management in Celiac Disease	Dr. Sabine Vriezinga
10:45-11:15	<i>Coffee break</i>	

### Part 2 – Workshop on e-learning programme

11:15-13:30	Workshop "e-learning for Health Care Professionals" and "e-learning for celiac patients"	Prof. S. Koletzko Prof. Berthold Koletzko Marie-Theres Karla Katharina Werkstetter
13:30-15:00	<i>Lunch and end of meeting</i>
